**GROUND FISH FISHING LICENCE 2018-2019
FOR VESSEL 19.8M TO 30.48M LOA
USING FIXED GEAR (FG)**

VESSEL CLASS: B8

This licence is valid from April 11, 2018 to March 31, 2019.

NOTE: This licence has been issued in English only at the request of the licence holder.

ALL GEOGRAPHICAL COORDINATES IN THIS LICENCE ARE BASED ON THE GEODESIC SYSTEM NORTH AMERICAN DATUM 1927, EXCEPT WHERE IT IS INDICATED THAT THE GEODESIC SYSTEM NORTH AMERICAN DATUM 1983 (NAD83) IS USED. FOR THE PURPOSE OF THESE LICENCE CONDITIONS, AREA "5Y" IS THE PORTION OF SUBAREA 5 NORTH OF 42°20 N.

THIS LICENCE IS ISSUED PURSUANT TO:

- THE FISHERY (GENERAL) REGULATIONS, AND
- THE ATLANTIC FISHERY REGULATIONS, 1985.

COMPLIANCE WITH

- THE FISHERIES ACT,
 - THE SPECIES AT RISK ACT, AND
 - THE REGULATIONS MADE UNDER THESE ACTS
- IS A CONDITION OF EVERY LICENCE.

A COPY OF THIS LICENCE MUST BE ON BOARD THE VESSEL AT ALL TIMES DURING ANY FISHING TRIP.

THIS LICENCE CANCELS AND REPLACES ANY PREVIOUSLY ISSUED GROUND FISH FISHING LICENCE FOR VESSEL 19.8M TO 30.48M LOA USING FIXED GEAR.

Pursuant to the above LAWS and REGULATIONS, the following conditions are specified:

1. VESSEL(S)

1.1 The vessel(s) that may be used in fishing under this licence are those set out in the Supplemental Licence Conditions - 2018/2019 "Vessel Schedule" provided separately.

2. SPECIES AND CATCH LIMITATIONS

2.1 The species, the quantities (tonnes round weight) and the areas of the North Atlantic Fisheries Organization (NAFO) convention area in which the licence holder or vessel operator is permitted to fish under this licence are in accordance with the ENTERPRISE ALLOCATION SCHEDULE FOR ENTERPRISES LICENSED TO USE VESSELS 19.8M TO 30.48M LOA (FG) as amended from time to time.

2.2 NOTIFICATION OF CLOSURE

2.2.1 When the allocation for a species identified for the vessel class of the licence holder or vessel operator fleet has been reached or is about to be reached, the licence holder or vessel operator is required to stop fishing for that species effective at the time stated in the notice.

Notice will be given by one or more of the following methods:

(a) broadcasting over:

- a commercial or marine radio station,
- a radio station operated by Fisheries and Oceans Canada (DFO), or
- a radio station located on a vessel under contract to DFO that broadcasts in the area or vicinity of the area affected by the closure notice; or

(b) transmitting the notice by electronic means to the licence holder or vessel operator; or

(c) having a fishery officer or fishery guardian give verbal notice thereof.

3. FISHING GEAR

3.1 The type and construction characteristics of fishing gear that may be used in fishing under this licence are set out in Column IV of Schedule I.

3.2 The licence holder or vessel operator is prohibited from using any means or device which obstructs the meshes of the net, or which diminishes otherwise the size of the meshes.

3.3 While fishing with gillnets under this licence, the licence holder or vessel operator is only permitted to use gillnets having the following characteristics:

(a) Individual gillnets must not be longer than 91.5m (50 fathoms).

(b) The maximum number of nets permitted to be used is 500.

3.4 When a vessel operating under this licence is transiting through any waters where fishing for groundfish is not authorized, all fishing gear on board the vessel must be:

- securely lashed and stowed; and
- unavailable for immediate use.

3.5 The licence holder or vessel operator is not permitted to fish with a groundfish gillnet unless a valid tag, issued under the authority of the Minister, is securely attached to the headrope of the net within 1.85 meters from one end of the net closest to the haul-up line for the fleet of nets.

3.6 Occurrences of lost gillnets must be recorded in the fishing logbook and reported to Fisheries and Oceans Canada (DFO) immediately as part of the daily hail. Lost net tag numbers must also be reported as part of the daily hail.

3.7 Every reasonable effort must be made to retrieve any lost nets.

3.8 When using gillnets or longline gear in 4RST and a secondary buoy is being used, the licence holder or vessel operator must ensure the following:

- A maximum of 3.7 meters of rope shall be used when attaching a primary buoy to a secondary buoy.
- No rope attaching a longline to a primary buoy shall remain floating on the surface of the water after the longline has been set.

For the purpose of this section, a primary buoy is defined as a buoy or other floating device attached to a longline or gillnet. For the purpose of this section, a secondary buoy is defined as a buoy or other floating device attached to a primary buoy.

4. FISHING RESTRICTIONS

NOTE: ACCESS TO THE NUNAVUT SETTLEMENT AREA AS DEFINED IN THE NUNAVUT LAND CLAIMS AGREEMENT OR THE NUNAVIK MARINE REGION AS DEFINED IN THE NUNAVIK INUIT LAND CLAIMS AGREEMENT IS LIMITED TO THOSE ENTERPRISES WHICH HAVE BEEN ALLOCATED QUOTAS IN THESE AREAS (AS AMENDED FROM TIME TO TIME).

4.1 Except when fishing exclusively in NAFO Division 4V and Subdivision 3Ps for Atlantic Halibut, the licence holder or vessel operator is not permitted to fish in more than one of the following groups of areas on a per trip basis, unless accompanied by an At-Sea Observer:

- 0, 2, 3KLM3NO;
- 3Ps;
- 4RST, 3Pn;
- 4VW;
- 4X, 5Y;
- 5Z.

4.2 When fishing for Greenland halibut in 2+3K or 3LMNO with fixed gear, the licence holder or vessel operator is not permitted to fish in both stock areas during any single set. Upon

commencement of a set, the licence holder or vessel operator must finish that set within that stock area before proceeding to any other stock area. All catch attributed to that stock area must be recorded for that stock area in accordance with the provisions for logbook reporting.

4.3 Other restrictions in areas where fishing may be carried out pursuant to these licence conditions are contained in Schedule IV.

4.4 NAFO REGULATORY AREA

4.4.1 This licence is not valid for operating in the NAFO Regulatory Area (NRA) unless the NAFO Schedule is attached and the licence holder or vessel operator has received a briefing from the Offshore Compliance Unit (Tel: 709-772-4412). While operating under this licence in the NRA outside Canadian Fisheries Waters, the licence holder or vessel operator must abide by the NAFO Conservation and Enforcement Measures, including those summarized in the NAFO Schedule.

5. BY-CATCH (INCIDENTAL CATCH)

5.1 For the purposes of these licence conditions, the "directed fishery" means the harvesting of permitted species, or combination of species that the licence holder or vessel operator is licensed to fish, harvested by the licence holder or vessel operator at a time, in an area and by a means authorized in licence conditions.

The "by-catch" means the incidental or unintentional capture of non-targeted species while fishing for directed species as authorized under the licence. This includes species not regulated.

For species in stock areas listed in Schedule III, by-catch is calculated as the weight of a by-catch species divided by the total weight of all species (as listed in Schedule III) X 100 retained onboard for that Division at the time of inspection.

For all other stocks within Canada's Exclusive Economic Zone (EEZ) except the directed Unit 3 Redfish fishery, by-catch is calculated as the weight of a by-catch species divided by the combined weight of all species authorized to direct for by this licence and for which the gear type is permitted.

5.2 Subject to those species which the licence holder or vessel operator is required or authorized to release as outlined below, all other groundfish not listed on the Enterprise Allocation (EA) Schedule

- are subject to incidental catch limits assigned to the FG 19.8M to 30.48M LOA (65-100 ft.) sector; and
- must be retained.

5.3 Pursuant to section 93.3(2) of the Atlantic Fishery Regulations, 1985, the licence holder or vessel operator must forthwith return to the place from which it was taken and, where alive, in a manner that causes the least harm, any:

- (a) Atlantic Halibut that is
 - less than 81 cm in length, or
 - less than 85cm in length when fishing in NAFO Divisions 4RST;
- (b) American Plaice that is less than 25 cm in length when fishing in NAFO Divisions 3LNO;
- (c) Yellowtail Flounder that is less than 25 cm in length when fishing in NAFO Divisions 3LNO;
- (d) Winter Flounder that is less than 25 cm in length when fishing in NAFO Divisions 3NOPs and 4T;
- (e) Thorny skate when fishing in NAFO Divisions 4VWX5;
- (f) all skates in 4S, 4T and 4VW other than Barndoor Skate when fishing in NAFO Divisions 4VW; and
- (g) subject to item 5.6, all fish other than groundfish incidentally caught.

Fish length is defined as the distance measured in a straight line from

- the tip of the nose or, where the head has been removed, from the foremost point of the fish, to
- the fork of the tail or, where the tail has been removed, to the end of the fish.

5.4 Pursuant to subsection 93.3(2) of the Atlantic Fishery Regulations, 1985, the licence holder or vessel operator is authorized to release to the water of the place from which it was taken:

- skate (except when the target of a directed fishery),
- sculpin,
- dogfish, and
- Grenadier.

Where alive, the fish must be returned to the water in a manner that causes the least harm possible.

When fishing outside NAFO Divisions 4VWX5, the licence holder or vessel operator is also authorized to release lumpfish and striped (Atlantic) wolffish. Inside 4VWX5, lumpfish and striped (Atlantic) wolffish must be retained.

5.5 The licence holder or vessel operator is authorized to return to the water White Hake used as bait when using long line gear in 3NOPs4VWX5. The round weight of White hake used as bait must be recorded in the logbook on a set by set basis.

5.6 Notwithstanding item 5.3 (f), when using fixed gear the following incidental catch provisions apply when fishing in NAFO Divisions 0A, 0B, 2GHJ3KLNO and NAFO sub-Division 3Ps:

- (a) Unless otherwise authorized, incidental catch for each trip shall not exceed 5% of the weight of the authorized species.
- (b) In NAFO Area 2 and Division 3K, incidental catch shall not exceed 10% per day by weight of the authorized species per incidentally caught species.
- (c) In NAFO divisions 3LNO,
 - incidental catch shall not exceed 5% per haul by weight of the authorized species per

incidentally caught species; and

- the total incidental catch on board for the trip shall not exceed the greater of 1250 kg, or 5%.

(d) Notwithstanding other provisions in this licence, when fishing for Yellowtail Flounder in NAFO Divisions 3LNO, the incidental catch of American Plaice by weight on board shall not exceed 15% of the total Yellowtail Flounder catch.

(e) When fishing in NAFO sub-Division 3Ps while the cod fishery is not authorized, the incidental catch of cod on each trip shall not exceed 10% by weight of the authorized species.

(f) When fishing in NAFO Division 3NO, the total weight of cod on board shall not exceed the greater of 1000 kg, or 4%, of the authorized species.

5.7 TREATMENT OF SPECIES LISTED UNDER THE SPECIES AT RISK ACT

5.7.1 In accordance with subsection 83(4) of the Species At Risk Act (SARA) and the recovery strategy for:

- the Northern Wolffish (*Anarhichas denticulatus*),
- the Spotted Wolffish (*Anarhichas minor*), and
- the Leatherback Turtle (*Dermochelys coriacea*),

the licence holder or vessel operator is permitted to carry out commercial fishing activities authorized under the Fisheries Act that may incidentally kill, harm, harass, capture or take:

- the Northern Wolffish,
- the Spotted Wolffish, or
- the Leatherback Turtle.

5.7.2 The following conditions apply to SARA listed species:

(a) This permission is only valid while commercial fishing is conducted

- in accordance with the Fisheries Act, and
- in all waters authorized under this licence.

(b) The licence holder or vessel operator must ensure that, while the fishing activities are conducted, every person on board the vessel who incidentally catches

- a Northern Wolffish,
- a Spotted Wolffish, or
- a Leatherback Turtle,

forthwith returns it to the place from which it was taken, and where it is alive, in a manner that causes it the least harm.

6. REPORTING REQUIREMENTS

6.1 The information that the licence holder or vessel operator shall report to DFO,

- prior to departure,
- from sea, or

immediately at the end of each fishing trip,

as well as the procedures that the licence holder or vessel operator shall follow in the landing of fish from the vessel used in fishing while fishing under this licence, is set out below.

6.2 PRE-DEPARTURE REPORT (HAIL OUT)

6.2.1 In order to facilitate the deployment of At-Sea Observers, a pre-departure report (Hail Out) is required from licence holders or vessel operators.

6.2.2 The licence holder or vessel operator must contact one of the designated at-sea observer corporations during regular office hours at least 24 hours prior to the vessel's departure. The licence holder or vessel operator will be issued by the observer corporation a confirmation number confirming that the hail has been received. This number is to be entered in the fishing logbook.

OR

6.2.2 (a) The licence holder or vessel operator based in the Maritimes Region must obtain a hail-out reference number from the Fisheries and Oceans (DFO) "Just Talk" hail-out system (1-866-665-4451 for English or 1-866-665-4452 for French) prior to departure for any fishing trip.

The licence holder or vessel operator will be issued by the "Just Talk" system a hail-out reference number confirming that the hail has been received. This number is to be entered in the groundfish monitoring document.

(b) When the start of a fishing trip is delayed for any reason by twelve (12) hours or more from the time stated in the hail, the licence holder or vessel operator must call the "Just Talk" system to:

- cancel the hail; and
- obtain a new hail-out reference number.

(c) At the time the hail out reference number is received, the licence holder or vessel operator may be notified if an at-sea observer is required. When notified that an at-sea observer is required, the licence holder or vessel operator must follow the instructions provided by the "Just Talk" system. The licence holder or vessel operator may also be directly notified that an at-sea observer is required by:

- the at-sea observer company; or
- the "Just Talk" call centre.

No person shall depart from port for a fishing trip until the at-sea observer is on board.

6.3 AT-SEA REPORT (DAILY HAILS)

6.3.1 Except when fishing in waters of NAFO sub-divisions 4VWX and 5 during a single trip, the

licence holder or vessel operator must report the following information while at sea to DFO Region of licence issuance, through hails using information required in the DFO APPROVED FORMAT (attached in Schedule II), on a daily basis no later than noon (12:00 hours local time), by fax or email at:

- Newfoundland and Labrador Region
- Fax: 709-772-4232
- Email: hails65@dfo-mpo.gc.ca

6.4 LOGBOOKS

6.4.1 As provided under Section 61 of the Fisheries Act, while at-sea and engaged in fishing, the licence holder or vessel operator must maintain a true and up to date record of his fishing activities and all catch, in a fishing logbook obtained from suppliers prequalified by DFO and in accordance with the supplied instructions. All fish caught, including that which is used for bait or personal consumption, must be recorded in the logbook.

The logbook must be completed accurately and the licence holder or vessel operator must complete a log section immediately:

- after each set; and
- at least once a day.

6.4.2 The licence holder or vessel operator must complete the SARA section in the fishing/SARA logbook to provide information regarding interactions with species at risk while conducting fishing operations. The licence holder must report in the fishing/SARA logbook for the fleet sector any interaction with:

- Northern Wolffish;
- Spotted Wolffish; or
- Leatherback Turtle.

The position (latitude and longitude) at time of catch, as well as the quantity, weight and condition (alive or dead) for each of the species mentioned above must be recorded in the logbook.

6.4.3 Marine Mammal Interaction Reporting

- a) The licence holder or vessel operator shall provide information regarding all marine mammals interactions during fishing trips;
- b) For the purpose of subsection 6.4.3 (a), lethal and non-lethal interactions include bycatch, collision and all sightings of marine mammals entangled in fishing gear;
- c) The licence holder or vessel operator must complete and submit the DFO Marine Mammal Interaction form (Schedule V) as per the instructions provided on the form.

6.5 PRODUCT LABELING

6.5.1 When processing from round weight to product form, the licence holder or vessel operator must label all groundfish harvested by the NAFO Division from which it was caught. All groundfish must also be labelled in such a way that each species, product form and date of capture is identifiable.

6.6 END OF TRIP REPORT (HAIL IN)

6.6.1 The licence holder or vessel operator must hail a trip summary to a dockside monitoring company approved or designated by DFO at least three (3) hours prior to returning to port for any reason. The trip summary must contain the following information:

- (a) Vessel name;
- (b) Name of the vessel master;
- (c) Vessel Registration Number;
- (d) Groundfish licence number;
- (e) Page number(s) of the approved vessel logbook that were used during the fishing trip;
- (f) The accurate round weight of fish on board the vessel by individual species;
- (g) The NAFO stock areas where the fish was taken;
- (h) The date and the local time (using the 24 hour system);
- (i) The place and time where the fish is intended to be offloaded; and
- (j) The intended buyer(s) of the fish.

6.6.2 The licence holder or vessel operator must enter immediately in the logbook the confirmation number that will be issued by the dockside monitoring company confirming that the hail report has been received.

6.6.3 When operating a vessel greater than 24m in length and offloading Greenland halibut harvested in NAFO Subarea 2 (Divisions 2GHJ) and Divisions 3KLMNO, the licence holder must:

- (a) provide 48 hours notice of the Estimated Time of Arrival of the vessel to port, to DFO, by e-mail to OffshoreNL@dfo-mpo.gc.ca or by facsimile to (709) 772-0008; and
- (b) land at one of the designated ports listed below:

Newfoundland and Labrador:

Argentia,
Arnold's Cove,
Bay Roberts,
Bay de Verde,
Bonavista,
Catalina,
Cartwright,
Corner Brook,
Dover,
Fermeuse, Fogo,
Griquet,
Harbour Grace,
L'Anse-au-Loup,
Lascie,
Long Pond,
Makkovik,
Marystown,
Nain,
Quirpon,
St. Anthony,
St. John's,
St. Lawrence,
St. Lunaire,
South Dildo,
Trepassey,
Triton,
Twillingate.

Maritimes:

Country Harbour,
Halifax/Dartmouth,
North Sydney,
Riverport,
Shelburne.

Offloading of Greenland Halibut must not commence until the vessel has been inspected by a Fishery Officer.

7. VESSEL MONITORING SYSTEM (VMS)

Fishing vessels operating under the authority of this licence must have a Vessel Monitoring System (VMS) and are subject to the following conditions.

7.1 The licence holder or vessel operator must have a Fisheries and Oceans Canada (DFO)-approved VMS unit installed on each vessel authorized to fish under this licence, with the VMS unit's antenna mounted in such manner that there is an unobstructed signal transmission and reception ensured at all times. A list of DFO-approved VMS units can be found at <http://www.nfl.dfo-mpo.gc.ca/e0011108> or by contacting DFO as outlined in Item 7.5.1.

7.2 Each vessel must be fitted with the approved VMS unit providing data to the DFO Vessel Monitoring Operations Centre. For each installation, replacement, transfer, resumption or suspension of a VMS unit, a completed DFO National Vessel Monitoring System Form (which can be found at http://www.nfl.dfo-mpo.gc.ca/folios/00380/docs/vms_form_ssn-eng.pdf) must be forwarded:

- by facsimile to 709-772-5787, or
- by mail to the following address: Vessel Monitoring System Program, Fisheries Management, Fisheries & Oceans Canada, P.O. Box. 5667, St. John's, NL, A1C 5X1.

The completed form must be transmitted within the following deadlines:

- a) at least two business days before commencing fishing operations, for each installation, replacement, transfer, or resumption;
- b) at most two business days after ending fishing operations, for each suspension or deactivation.

7.3 Where, in accordance with item 7.1, a VMS unit is in use on the vessel, the licence holder or vessel operator must ensure that the system is fully operational, turned on and in use, from the time the vessel leaves port for fishing until all of the fish on board the vessel is offloaded in a Canadian port. While a vessel is at sea outside of Canadian waters or docked in a foreign port for any purpose, the VMS unit must remain turned on and in use for the duration of the stay in the foreign port or outside of Canadian waters.

7.4 The VMS unit on the vessel must report automatically each hour to DFO the following information:

- (a) Communication Service Provider (CSP) identifier for the VMS unit;
- (b) geographic position (latitude/longitude) of the vessel; and
- (c) date and time corresponding to this position.

7.5 The licence holder or vessel operator of the vessel authorized to use a VMS unit must immediately cease all fishing activity during any fishing trip, should any or all of this equipment become inoperative, be turned off, or be malfunctioning in any way. The licence holder or vessel operator of the vessel must not resume any fishing activity while the VMS unit is inoperative, is turned off, or is malfunctioning in any way.

7.5.1 The licence holder or vessel operator must notify DFO of any such malfunction by:

- email at: VMS_Support@dfo-mpo.gc.ca; or
- telephone toll free at 1-888-772-8225, Monday to Friday, 8:30 a.m. to 4:30 p.m. (Newfoundland

Standard time); or

- after hours, leaving a detailed message containing the following information:
- name of licence holder or vessel operator;
- name of vessel and vessel registration number;
- date and time of sailing;
- port of landing; and
- telephone number where the licence holder or vessel operator can be reached.

7.5.2 Once the VMS unit is turned on and fully operational or when the licence holder or vessel operator receives approval from DFO, the licence holder or vessel operator is then authorized to resume fishing.

7.6 Where, in accordance with item 7.1, a VMS unit is used on the vessel during any fishing trip, no person shall:

- (a) alter or tamper with the VMS unit or its operation;
- (b) destroy, dispose of or remove the VMS unit or its associated electronic records or storage media;
- (c) emit, or cause to be emitted, any electronic or electric signal that renders the equipment or system inoperative or inaccurate;
- (d) interfere with, or block, any signals required by the VMS unit to gather, record, or transmit information; or
- (e) turn off the VMS unit from the time the vessel leaves port until it returns to port and all of the fish on board the vessel is offloaded.

7.7 In the event of a VMS unit failure, where a vessel carries two or more approved VMS units on board, it is the responsibility of the licence holder or vessel operator to immediately notify DFO that a secondary unit is being activated and subsequently ensure it is fully operational, turned on and in use before resuming fishing activity.

7.8 Note that under the Canada-Greenland VMS Sharing Arrangement, VMS information collected by DFO on vessels sailing or fishing into Greenlandic waters will be provided to the Greenlandic Fisheries Authorities.

While operating in Greenlandic waters, should the VMS cease to work properly, the licence holder or vessel operator of the vessel must report to DFO, by telephone Toll Free 1-888-772-8225, the appropriate information on an hourly basis until a Greenlandic or Canadian port has been reached and repairs can be performed.

Once in a Greenlandic port, if repairs are not carried out in a timely fashion, Greenland may refuse to the contravening vessel fishing access to its waters.

8. AT-SEA OBSERVERS

8.1 The licence holder or vessel operator may be required to have an at-sea observer onboard the vessel during any fishing trip.

Where the licence holder or vessel operator is required to have an at-sea observer onboard, the licence holder or vessel operator must not depart from port for a fishing trip until the at-sea observer is onboard the vessel.

9. FISH LANDING PROCEDURES

9.1 The licence holder or vessel operator must not offload fish or any portions thereof from the vessel unless all of the following conditions are adhered to:

- (a) Offloading may only be carried out in the presence of a dockside observer, who will verify the weight, species and product form of all fish being offloaded.
- (b) The licence holder or vessel operator must provide access to the fish holds, freezer and other fish storage areas to a dockside observer. The master must provide a copy of the vessel's fishing logbook to the dockside observer upon request.
- (c) Offloading cannot occur prior to the time specified in the End of Trip Report.
- (d) The licence holder or vessel operator must ensure that the dockside observer is able to maintain visual continuity of the fish being removed from the vessel at the dockside point of offloading.
- (e) Where a site plan has been approved by DFO, all fish must be separated and weighed in accordance with the protocol provided for in the site plan.
- (f) Where a DFO approved site plan is not available or has become invalid, all fish must be separated by species and weighed immediately upon removal from the vessel at the dockside point of offloading.
- (g) All fish on board the vessel must be weighed.
- (h) An accurate weight of fish offloaded must be supplied to the dockside observer immediately after offloading the fish from the vessel.
- (i) The licence holder or vessel operator is required to land any Greenland halibut caught from NAFO Area 2 and NAFO Divisions 3KLMNO at one of the designated ports listed below:

i. Newfoundland and Labrador:

Argentina,
Arnold's Cove,
Bay Roberts,
Bay de Verde,
Bonavista,
Catalina,
Cartwright,
Corner Brook,
Dover,
Fermeuse,
Fogo,
Griquet,
Harbour Grace,

L'Anse-au-Loup,
Lascie,
Long Pond,
Makkovik,
Marystown,
Nain,
Quirpoon,
St. Anthony,
St. John's,
St. Lawrence,
St. Lunaire,
South Dildo,
Trepassey,
Triton,
Twillingate.

ii. Maritimes:

Country Harbour,
Halifax/Dartmouth,
North Sydney, Riverport,
Shelburne,
Lockeport,
West Head on Cape Sable Island.

9.2 Licence holders or vessel operators registered outside of the Maritimes Region must hail to a dockside monitoring company that has been approved or designated by DFO prior to leaving port. The following information must be provided:

- (a) Date, local time (using the 24-hour system);
- (b) Name of licence holder;
- (c) Name of vessel, and Vessel Registration Number (VRN);
- (d) Name of vessel master or designated vessel operator;
- (e) Port of departure;
- (f) Date and estimated time of departure;
- (g) Intended directed species and fishing area;
- (h) Estimated date of return to port;
- (i) The log page number to be used for the trip.

9.3 For the purposes of this condition of licence, a site plan is a written document that has been approved by DFO and includes weigh-out procedures that ensure the continued surveillance of the fish by dockside observers until it is weighed.

A site plan becomes invalid when notification of termination is provided by written and/or verbal notification by a Fishery Officer.

9.4 FISH LANDING PROCEDURES IN GREENLAND

9.4.1 Offloading can only occur in a Greenland port that is authorized under the control of the European Union Border Inspection Post (i.e. Nuuk or Sisimiut).

9.4.2 Where authorized to land or offload in Greenland, the offloading must be monitored by a DFO designated dockside observer (see Section 9.1).

9.4.3 When landing or offloading in Greenland, the following procedures must be followed:

(a) The licence holder or vessel operator must notify the DFO region of licence issuance by fax or by email at least 3 working days in advance of entering a port in Greenland and provide the following information (contact information provided below):

- i. Date and location of offloading;
- ii. The vessel master's estimate of the weight of each species of fish onboard and the product form to be offloaded; and
- iii. The name, telephone and fax number of the authorized agent under whose auspices the catch will be offloaded.

(b) Upon completion of the offloading in a Greenlandic port, all documentation indicating the weight of fish by species and product form offloaded and all other offloading documents are to be:

- signed by the offloading agent; and then
- emailed or faxed to DFO region of licence issuance immediately (contact information provided below).

(c) The licence holder or vessel operator must email or fax to DFO region of licence issuance (contact information provided below), immediately after this process occurs, all documentation related to the process of sorting and weighing of fish that occurs in Danish facilities, including but not limited to:

- i. the number, size, weight, species, product form, value or other particulars of any fish caught, processed, transported, sold or purchased.

(d) The licence holder or vessel operator must email or fax to DFO region of licence issuance (contact information provided below), immediately after the sale occurs, all documentation related to the sale of fish, including but not limited to:

- i. the number, size, weight, species, product form, value or other particulars of any fish sold; and
- ii. the time and place at which any fish was sold and the person, enterprise or vessel which purchased the fish from the licence holder or vessel operator.

9.4.4 Where authorized to land or offload in Greenland, the licence holder or vessel operator shall ensure that all species harvested are labelled using the NAFO 3-Alpha code for each species (e.g. GHL).

SCHEDULE I
FISHING GEAR TYPE AND CONSTRUCTION CHARACTERISTICS

Unless otherwise provided in this licence and while fishing for the species listed in column I below in the NAFO CONVENTION STOCK AREA specified in column II below, the licence holder or vessel operator is only permitted to use gillnets of a minimum mesh size specified in column III, or longline fitted with hooks with a minimum gape opening specified in column IV.

For the purposes of this licence, gape opening is defined as the shortest measurement from the shank of the hook to the tip of the hook.

NOTE: When fishing in the NRA, gear restrictions as per the NAFO Conservation and Enforcement Measures will apply.

NAFO MANAGED STOCKS UNDER QUOTA

Unless otherwise provided in this licence and while fishing for the species listed in column I below in the NAFO CONVENTION STOCK AREA specified in column II below, by-catch is calculated as the weight of a by-catch species divided by the total weight of all species (as listed in the table below) retained onboard for that Division at the time of inspection X 100.

NOTE: When fishing in the NRA, by-catch provisions as per the NAFO Conservation and Enforcement Measures will apply.

SCHEDULE IV FISHING AREA RESTRICTIONS

Note: When the geographic boundary of an area is expressed in Latitude and Longitude, those point references are based on the geodesic system North American Datum 1983 (NAD83). Positions are expressed in degrees, minutes and seconds.

1. When fishing redfish in Unit 1, as defined in 2.2.(a)i. and 2.2(a)ii of the licence conditions, the licence holder or vessel operator is authorized to fish only between 59° and 65° West longitude at depths greater than 100 fathoms.
2. When fishing for redfish, the licence holder or vessel operator is not permitted to fish in the portions of NAFO Division 4T described below enclosed by rhumb lines joining the following points in the order in which they are listed:

Point	North Latitude	West Longitude
1.	49°07'42"N	63°47'19"W
2.	48°56'46"N	63°15'23"W

7.	42° 04' 00" N	65° 44' 00" W

- (d) That portion of NAFO Division 4X enclosed by rhumb lines joining the following points (Bowtie) in the order in which they are listed below, from January 1 to June 30 each year:

Point	North Latitude	West Longitude
1.	43° 27' 00" N	65° 12'00" W
2.	43° 05' 00" N	65° 40'00" W
3.	42° 40' 00" N	65° 40'00" W
4.	42° 10' 00" N	64° 28'00" W
5.	43° 27' 00" N	65° 12'00" W

20. The licence holder or vessel operator is not permitted to fish, unless accompanied by an At Sea Observer:

- (a) with mobile gear in NAFO Subarea 0;
- (b) with fixed gear in Division 0A; and
- (c) from January 1 and April 30, with fixed gear in Division 0B.

21. The licence holder or vessel operator is not permitted to fish with long line in Division 0B south of 63° 10' N from October 1 to December 31, except where water depth is greater than 1372m (750 fathoms).

22. The licence holder or vessel operator is not permitted to fish for Groundfish using mobile gear in the portion of Division 0A (Disco Fan Conservation Area) enclosed by the following points in the order in which they are listed, during the period January 1 to December 31 each year:

Point	North Latitude	West Longitude
1	67° 23' 7.990" N	57° 53' 17.395" W
2	67° 15' 0.000" N	57° 50' 40.207" W
3	67° 15' 0.068" N	58° 53' 37.441" W
4	67° 23' 8.000" N	58° 56' 14.614" W
5	67° 23' 7.990" N	57° 53' 17.395" W

Points 1 and 2 are connected by a line following the limit of Canada's Exclusive Economic Zone. All other points are connected by rhumb lines.

23. The licence holder or vessel operator is not permitted to fish for Groundfish in the portion of Division 0A (Disco Fan Conservation Area) enclosed the following points in the order in which they are listed, during the period January 1 to December 31 each year.

Point	North Latitude	West Longitude
1	68° 15' 0.000" N	58° 33' 12.750" W
2	67° 23' 7.990" N	57° 53' 17.395" W

INSTRUCTIONS FOR COMPLETING THE MARINE MAMMAL INTERACTION FORM

As per the Fisheries General Regulations under the Fisheries Act, this reporting form must be completed immediately after any accidental contact between a marine mammal and a vessel or fishing gear.

The completed form must be sent to the following email address:

Email: DFO.NAT.InteractionsMM-InteractionsMM.NAT.MPO@dfo-mpo.gc.ca

The licence holder is required to report an incidental mortality or injury within 48 hours after the end of the fishing trip (even if an observer is on board). A separate report form is required for each incident, for each date, and for each location.

GOAL OF DATA COLLECTION

The information supplied on this form will be used by the Department of Fisheries and Oceans Canada to estimate levels of incidental mortalities and injuries to marine mammals. This information allows DFO to better assess the types of threats that may be affecting Canada's marine mammals and develop mitigation strategies. Certain information supplied on this form may be considered proprietary and therefore subject to data confidentiality restrictions of the Privacy Act.
